WHAT IS SUBLIMATION

Sublimation is a process of transforming of inks that, upon coming into contact with heat, pass from the solid state to gaseous state (sublimate). The transformation allows the ink to bond in a stable manner to the polyester surface.

ABOUT SUBLIMATION

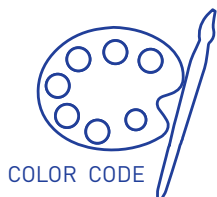

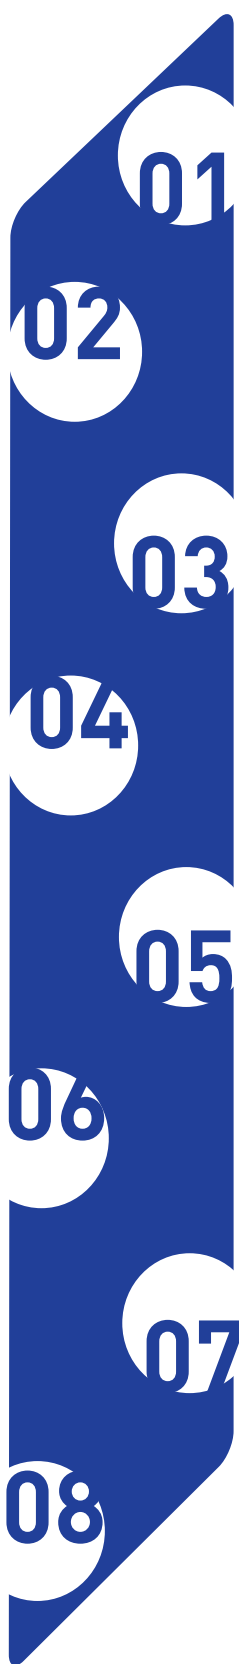

ADVANTAGES OF SUBLIMATION.

Once the color has combined with the polyester in a permanent way, it will become resistant to scratches and decay of the color. The end result provides a surface perfect without relief or thickness, breathable, washable, durable and that preserves the inherent texture of the fabric used. Sublimation printing is convenient in the case of application of multiple prints.

SPECIAL ATTENTIONS TO THE PRODUCT

In order not to reactivate the sublimation process which would result in a possible migration of color, it is recommended to avoid washing at high temperatures and the use of the dryer.
